Bridge Condition (All NBI Bridges)

Based on Federal Highway Administration (FHWA) criteria, bridges in the National Bridge Inventory (NBI) undergo regular inspection. Based on the level of deterioration identified through these evaluations, bridges are categorized as being in good, fair, or poor condition. The figures below represent the percent of Rhode Island's NBI bridge decking that are in good or fair condition. [Note: Data displayed is as of March of the relevant year, when the data is reported to FHWA. 2024 and 2025 targets are based on the latest Transportation Improvement Program (TIP) amendment and are subject to change.]

Pavement Conditions (Interstate)

RIDOT is committed to maintain the pavement on its portion of the National Highway System (NHS) Interstate system in a state of good repair. Based on Federal Highway Administration criteria for MAP-21 reporting, RIDOT's percent of pavements of the Interstate is used to evaluate the condition of Interstate roads based on the International Roughness Index (IRI), rutting, faulting, and cracking. The figures below represent the percent of pavements of the interstate system in good and fair conditions. RIDOT's focus on pavement maintenance and preservation has resulted in an interstate system with relatively little "poor"-rated pavement. [Note: 2023 pavement data will be available in April 2024.]
