1. What is BFM?

Budget Formulation and Management is the software tool that will be used by the State to prepare budgets, track performance measures, and report on in-year budget-to-actuals. It includes a reporting solution that allows users access to any data that has been entered in BFM in any format.

2. Changes by Fiscal Year

2.1 **2023**

- The Decision Package form now features a flag. When activated, this flag will include the decision package in the agency's request. If not activated, the entire decision package will be excluded.

2.2 **2023**

- The Decision Package form will now include revenue naturals including series 4XXXXX and 5XXXXX so that agencies can create packages with revenue impact. The inclusion of revenue naturals on the Decision Package form will allow agencies to submit stand-alone revenue generating proposals as well as comprehensive proposals that include both revenue and expenditure components. This change will not only allow agencies to include revenue generating proposals in Decision Packages, but also allow for more efficient tracking of such proposals across agencies and throughout the budget development process. Refer to Appendix – List of Revenue Naturals and Revenue Categories.

2.3 **2022**

- The Decision Package form will now include revenue naturals including series 4XXXXX and 5XXXXX so that agencies can create packages with revenue impact. The inclusion of revenue naturals on the Decision Package form will allow agencies to submit stand-alone revenue generating proposals as well as comprehensive proposals that include both revenue and expenditure components. This change will not only allow agencies to include revenue generating proposals in Decision Packages, but also allow for more efficient tracking of such proposals across agencies and throughout the budget development process. Refer to Appendix – List of Revenue Naturals and Revenue Categories.
- This year, while base budget changes can continue to be submitted through the BFM base budget form, as has been the case in previous years, agencies will also be able to submit base budget changes utilizing the Decision Package form in BFM. Alongside “Constrained” and “Unconstrained”, agencies will now be able to select “Base Budget Change” in the dropdown menu on BFM Decision Package form. The base budget change Decision Package is provided as a convenience to agencies that wish to group changes together or provide additional detail in the item description field about a given change. Agencies should group base budget changes by program and provide explanations for each shift within the BFM item description field. For more

complicated base budget changes, which generally would include changes to a line sequence that are more than either \$10,000 or 10% of the line sequence value, whichever is larger, agencies should include additional analysis and contextual information in BFM.

- This year, agencies will be asked to input their outyear forecast for constrained and unconstrained Decision Packages in the BFM budget form. If the outyear field is left blank, the Budget Office will assume that the proposal's outyear impact will remain steady and will apply standard grow rates to estimate outyear costs. However, if proposals have unique outyear impacts (for example, if a proposal begins six months into a fiscal year, or there are expected changes in caseload across years, or a proposal is a one-time expense and does not have outyear costs) agencies should include their outyear estimates in the Decision Package form.

If you have questions about the changes occurring this year, please contact your assigned Budget Analyst.

2.4 2021

The contract form will no longer be used. Instead, 63XXX natural accounts will be entered into the Base Budget Form and contract details will be entered in an excel template. A template will be provided to track contract detail such as contract and vendor information. If you have any additional questions about the proper way to complete the template, or the information required, please contact your assigned Budget Analyst. Send the completed template to your Budget Analyst who will ensure the data is uploaded into BFM. The data will be available using report **106 – Contract Summary**.

All performance measures are not editable in the **Performance Measures form (9260 or 9460)**.

2.5 2020

BFM Personnel Cost Forecasting (PCF) projection will be utilized for both years starting with this budget cycle. The BFM software is loaded with positions and employees from HR along with any updates made by your agency during the clean-up period. The planning values will be updated to create the base personnel budget. This includes salaries, benefits, supplemental pays, and statutes. Agencies will have the opportunity to make updates during the budget preparation period

2.6 2019

- SWP / Planning Values concept is being replaced with a BFM Personnel Cost Forecasting (PCF) projection. The BFM software is loaded with positions and employees from HR along with planning values and creates the base personnel budget. This includes salaries, benefits, supplemental pays, and statutes. Agencies will have the opportunity to make updates to correct data errors (such as incorrect steps) and change allocations.
- The concept of Constrained versus Unconstrained budgets has changed.
 - For FY 2019, Agencies are asked to submit a **Base Budget**, which is the cost of maintaining current services after accounting for inflation and operational efficiencies.
 - In addition, Agencies will be given a budget **Target** and guidelines for any additional

budgetary submissions. These targets are created in the same manner as in 2018 but will be met by Agencies submitting a series of Decision Packages that will be reviewed as part of the budget process. Decision Packages will feed reports that will replace 2018's Budget Impact Statements.

- Decision Packages will be assigned to the Constrained or Unconstrained budget types
- The Departmental Revenue Estimating (BR-7) process has also changed significantly. Instead of submitting a document with a series of amounts that have been entered elsewhere in the system, Agencies will enter estimates for new restricted revenues, grant awards and prior year balance adjustments and the BR-7 will be produced as a report. This should save agencies time in compiling information for this purpose.
- The concept of having two forms, one for the revised budget and one for the new year submission has been changed. Under Budget Formulation we now have one form for both fiscal years to accommodate the multiple requests we received for this change.
- Personnel Adjustment form will not be allowed by agencies this fiscal year. All PCF changes will need to be reflected in your turnover line.

3. BFM Terminology

PCF: Personnel Cost Forecasting. BFM creates the base personnel budget based on HR data and planning values loaded in the system. This replaces the Salary and Wage Projection (SWP).

Budget Form: This is how you enter data into BFM. A Budget Form is a specific layout that has certain required fields, such as text, price, quantity, or other information.

Report: This is how data from multiple forms is consolidated. Reports are also used to view historical actuals and adopted budgets alongside the budget request data.

Stage: Stages are how BFM creates workflow. End users will enter their budgets in the Program Budgeting stage. The budget request will be submitted to the OMB Analyst Review stage. OHHS agencies have an additional OHHS review stage that other agencies will not see.

Form Instance: A form instance is the generic term for a particular budget form that you access to enter your budget. Each form instance has an ID, called a Form Instance ID, which is a unique numerical code that is assigned to each budget request. This ID is not generally referred to except for Decision Packages since agencies may submit multiple Decision Packages and each will have a unique Form Instance ID.

Org/Organization: a generic term referring to the organizational dimension which consists of Agency, Program, Subprogram, and Line Sequence as well as performance measures.

4. The Budget Equation – How to Build Your Budget

BFM is designed to allow different components of the budget to be added together to create a budget request. Budget forms are used to get data into BFM; **REPORTS** are used to view the data.

4.1. Program versus Agency budget forms

Note that most budget forms have two options, one form where submissions are created at the **Agency** level and one form where submissions are created at the **Program** level. This is to allow agencies that have programs submitting budgets for agency review to have this capability while not forcing agencies that are more centralized to create one budget form per program. Users will only see one type of form, Program or Agency. Upon using the system if you determine that you need to switch from being an Agency-level form Agency to a Program-level form Agency, contact BFM Support as noted in "How to get help".

4.2. Budget Forms

Following are the budget forms that will be used for 2025 budget preparation. Additional forms may be added as needed. Form numbers in () such as (9200) are for reference only.

Menu	Form Name	Description/Purpose
	Base Budget Form - Agency (9200)	Use the Base form to make any adjustments to your base budget that do not impact services . This form will

Menu	Form Name	Description/Purpose
Budget Formulation	Base Budget Form – Program (9210)	not include PCF (Salary and Benefit) Naturals. Contract naturals are now included as of 2020.
	Decision Package Agency (9230)	Use the Decision Packages form to enter a group of specific line sequences and naturals that together comprise a specific change to your current services. In many cases these may be reductions to meet targets but increase packages for new or expanded services may be requested. This year, the Decision Package form may also be used to enter base budget changes.
	Budget Review	This form displays all of the 2025 Decision Packages and allows ranking and, in later stages, OMB recommendations.
	Strategic Planning	Use this form to request new performance measures, update existing performance measure descriptions, or update Agency/Program text that prints in Volumes 1-4 of the budget book.
	Estimated Departmental Revenues – Agency (9410)	Agencies responsible for collecting general revenue departmental receipts (e.g. license fees, fines and penalties, etc.) must use this form to provide updated estimates of these revenues for the 2024 budget year.
	Federal / Restricted Receipts - Agency BR-7 (9270)	Use this form to make updates to prior year balance forward and new revenues / grant awards. This form is used for BOTH 2024 Revised and 2025 Budget since the BR-7 report shows the relationship of the two years.
	Federal / Restricted Receipts - Program BR-7 (9470)	
	Agency Submission Attachments (5400)	This form is used to submit any supplemental documents to OMB. There is one form per agency.
	Agency Submit (9900)	The form allows a user to submit a set of forms together.
Budget Management	Attachments – All Forms View (5500)	Allows Agencies the ability to manage all their document uploads in one place.
	2024 Revised Budget ARB	Create Authorized Red Balance (ARB) entries; these will be approved and sent to the financial system apart from the rest of the budget process. Submit the ARB to your OMB Analyst, who will route through approvals and initiative the process to load the data to RIFANS.

4.3. Budget Form Stages/Workflow

Budget forms advance through the budget process using a concept called Stages. Stages are unique to each budget form and the first three characters of a stage are the form to which they are assigned.

For example, Base Form 9200 has stages 9201, 9202, 9203, 9204 and 9208. For simplicity, those stages are often referred to generically by the last digit, such as 9201 as 'Stage 1'.

The stages used for Rhode Island are:

Stage	Description
1	Agency Stage 1 (often used for program submissions)
2	Agency Stage 2
8	Agency Stage 3 – used for special additional reviews for certain agencies
3	OMB Analyst
4	OMB Manager / Governor's Recommended

Users are assigned different roles to facilitate this workflow. For example, one user will have EDIT access to ONLY stage 1 and can SUBMIT to stage 2, while their agency approver has access to EDIT stages 1 and 2 but can submit to stage 3, OMB. If security changes are required, contact the BFM Administrator.

Once you Submit your budget you will not have access any longer, but the approver has the authority to Submit the request backwards in the process, so contact the appropriate reviewer if you need to make changes post-submission (assuming the deadline has not passed).

5. How to Access BFM

BFM is accessed via internet browser and can be accessed from any internet connection.

- **BFM Links:** Your BFM Link is below. Save your link as a Favorite for easy access. <https://ri.bfm.cloud/bfmprod/default.aspx>
- **Reporting:** In BFM, go to Links / BFM Reporting to access reports.

- **ID/PW:** Your BFM system administrator will send your Userid and Password.
- **Timeout:** Web-based applications have a built-in timeout function. A timeout function is required so users do not leave idle windows open for excessive amounts of time, impacting overall performances.

The current timeout is set at 20 minutes. Be sure to save often as you work. If you are idle for more than 20 minutes, you will have to log back in and any work you did not save will be lost.

6. Browsers and Internet Security

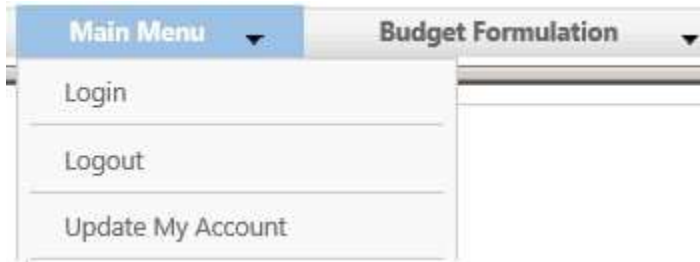

BFM now supports multiple browsers including Edge, Chrome, Firefox and Internet Explorer (IE). Since BFM is a web-based application, please be aware of some browser-specific issues. In some cases, IE displays screens slightly differently from the screen shots in this document, but the functionality is the same. For example, older versions of IE will show buttons as rectangles instead of ovals.

In addition, the first time you use BFM on a new computer, there may be requests from the browser to **trust the application, accept pop-ups, or other warnings**. Accept any of these requests and when possible, check the options to not remind you in the future / always trust / etc.

7. Logging In

7.1.1. Click on the BFM link or select it from your Favorites.

7.1.2. From the top level menu bar at the top left of the screen, click on **Main Menu**, then login using your *Userid and Password provided in a previous email*.

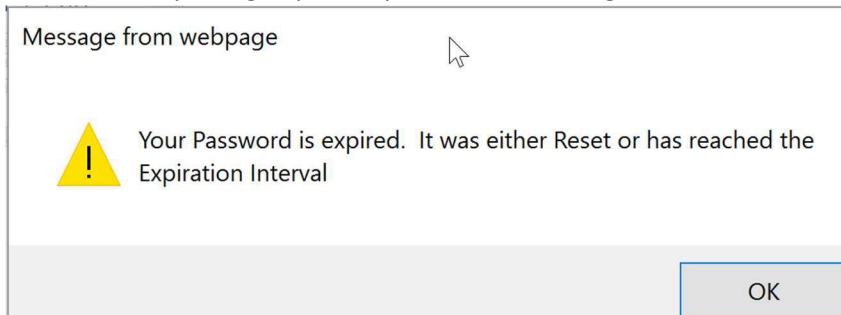

7.1.3. Enter your Userid and Password, then click **Submit**.

Userid:

Password:

Change Password

The first time you log in you may receive this dialog box:

7.1.4. Click **Ok**.

7.1.5. Set your new password and click **Update**.

- Users often will set the password to match their computer log-in
- Follow all State guidelines for proper password complexity

From the top-level menu bar at the top left of the screen, click on Main Menu, then login using your Userid and Password provided to you. If you do not have a Userid or are not sure, please reach out to Lisa Henriques, OMB Database Administrator at Lisa.Henriques@budget.ri.gov.

8. Basic Navigation

Each user has different Security. The level of Security controls the menu items that appear in the application.

BFM relies mostly on the mouse for navigation. Some users prefer navigation using keyboard shortcuts, tabs/enter, and other shortcuts. At this time, only a few of the typical keyboard shortcuts work. We encourage users to use mouse point-and-click for the majority of the navigation.

8.1 How to Navigate:

8.1.1. Hover over any top-level menu item to see the assigned entries.

8.1.2. Place your cursor directly below and click to select any menu item.

8.2 Paging through records

The bottom panel determines how many records are visible per page and allows you to page through records. A record refers generically to a piece of data that may vary based on the screen you are on; in some screens it may be a distinct budget form instance, in other screens it may be a detailed budget entry.

8.2.1. Click on the Records Per Page, the default setting of 50 is highlighted. With this setting, 50 records are displayed.

9. Enter the Budget

9.1 Adding Budget Entries

9.1.1 Select the Base Budget Form (9200 or 9210).

Form definitions are selected from the Budget Formulation menu.

After selecting a budget form, the "List Page" appears, which will return a form for each agency or program based on your security. If there are no agencies or programs listed for your security role this will be blank.

Base Form - Agency

Quick Search: [Show Advanced Filters](#)

Record Actions:

Form ID	Description	Stage	Agency	Form Rows	Last Update	Last User	Submit	Actions
1190	068 - DEPARTMENT OF ADMINISTRATION	9201	068	0	5/30/2017	u1	Submit	Header Detail

Records per page: [X](#) Records: 1 - Page: [1](#) of [1](#)

All of the budget forms navigate in the same manner. There is a **Header** page that provides the options for a long text description or attachments. There is a **Detail** page where budgets amounts are entered. You will mostly use the **Detail** page for forms other than Decision Packages.

9.1.2. Click the **Detail** button to open the budget form entry details. Note: The system executes a query once you click the tab which may take a few seconds for the screen to open. There is no hourglass.

The budget form will query the data for the header elements and all budget lines will be displayed.

Screen:	Budget Form Details - General
Field	Description
Row	Read Only. Number indicating row count.
Audit Trail	Magnifying Glass button. Opens a window to display the audit trail records for the selected row.
Line Seq	Read Only. Budget line Line Sequence.
LS Name	Read Only. Budget line Line Sequence Name.
Program	Read Only. Budget line Program for the Line Sequence.
Natural	Read Only. Budget line Natural.
Natural Name	Read Only. Budget line Natural Name.
Display Columns	Read Only. Displays data such as Enacted budget, Revised Budget, base budget amounts. This will be different for each form.
Entry Columns	Column used to enter data, such as Base Budget Changes in the example above. The name of these columns often has an * at the end to indicate it is editable.
Summary Columns	Read Only. This is a display column that adds the values in other display columns with Entry columns. In the example above, this is adding Current Services Base with Budget Changes to create the Total Base Request.
Justification	Text justification.
Pencil	Button. When clicked, the Line Detail screen will display to allow budget request entries. Double-clicking a row performs the same action.

9.2 Data Entry – Export/Import From Excel

The most efficient way to work with BFM is to first Export the existing budget form, make your changes in Excel, and re-import. Most users are very efficient with the Excel tools and can quickly add formulas to make the data entry process rapid.

Following are generic instructions on how to complete and Export/Import. A user will export, make changes, then import. The instructions in this section show click-by-click to ensure any issues or questions a user has can be answered in the user guide.

Note that **specific export definitions** are shown in the subsequent sections where each form's process is displayed. For example, Decision Packages will not export display columns since they are zero-based forms. Base forms have a series of display columns to help users build their budget.

Any spreadsheet can be uploaded to BFM using the Import function; however, **the spreadsheet format is very specific**. Your spreadsheet columns must match the columns on the BFM budget form. Below is the most reliable methodologies for creating an Import File:

- Click **Export** in the budget form, then make your entries directly into the pre-formatted spreadsheet and **Import**.
- Click **Export** in the budget form. Make entries in other spreadsheets. Copy the values into the Export template once you are ready to **Import**.
- Click **Export** in the budget form. Use formulas to link those cells to the more elaborate source spreadsheets and upload the properly formatted file when ready.
- Run **report 060 – Line Sequence – Natural Combinations** to get a list of valid Natural codes, Line Sequences, and a list of what combinations have been used in the past. This may be of use when building Decision Package forms that are zero-based. Make your entries and ensure they columns match the appropriate form you are importing.

9.2.1. Go to Budget Formulation / Select the budget form.

9.2.2. Select the instance you wish to update. In the example below, there is only one instance.

9.2.3.9.2.3. Click Detail (or navigate from the Header)

Base Form - Agency

Records per page: 50

At this step, users may have different interactions depending on their settings for downloads. You may be prompted to **Open** or **Save** your file, or a default action has been selected in the past. The following example will follow choosing **Open**.

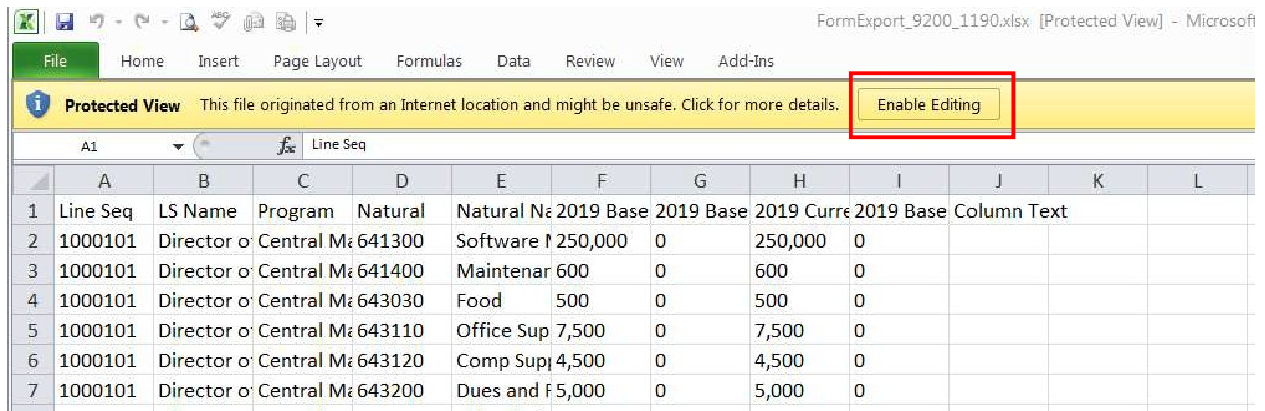

Note, that if you **Save** or **Save As**, open the file and just follow the **Open** instructions below. **Save As** is found by clicking on the arrow to the right of **Save** and choose **Save as**.

9.2.5.Click **Open**.

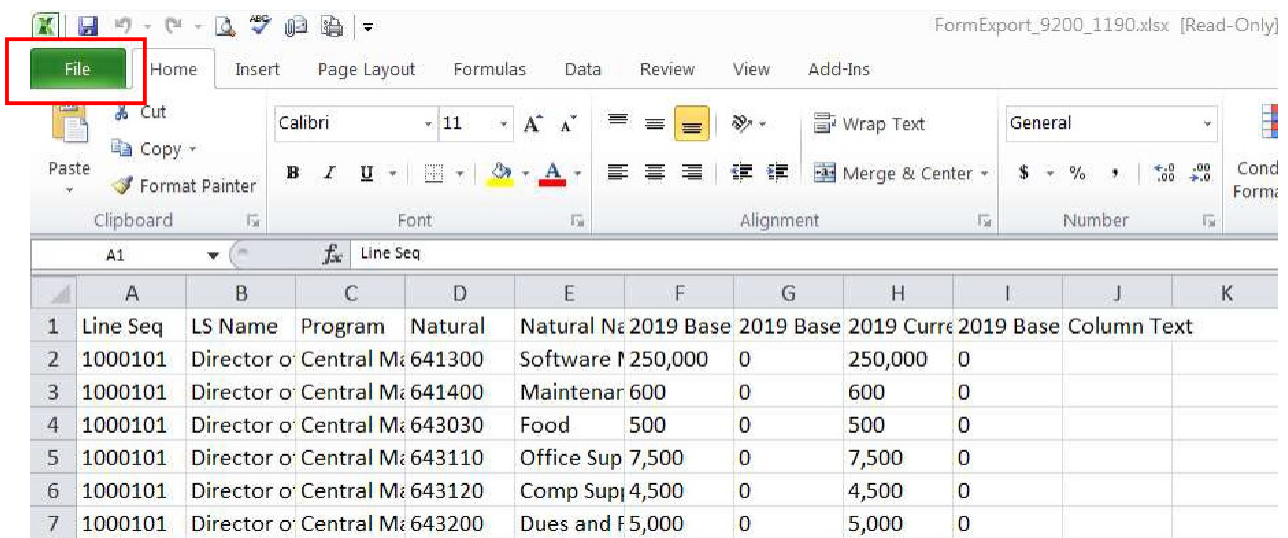

9.2.6.An Excel spreadsheet will open. There will be a yellow '**Protected View**' ribbon at the top of the spreadsheet. Click the **Enable Editing** button.

Note: you can eliminate this **Enable Editing** button from coming back by going to Excel: File/Options/Trust Center/Trust Center Settings/Protected View/uncheck everything.

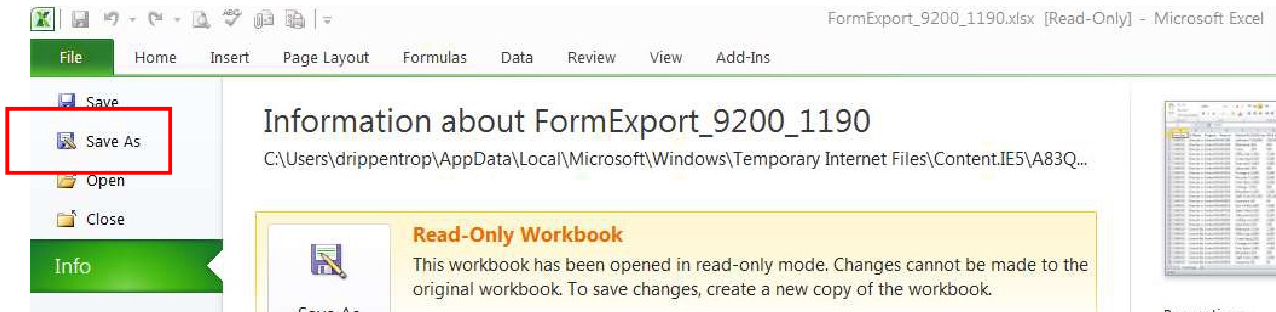

You will not be able to make changes in the spreadsheet unless you enable the spreadsheet to accept edits.

9.2.7. Next, it is best to **Save As** the spreadsheet. The original spreadsheet is saved as read only since it comes from the internet. Click **File** on the ribbon.

9.2.8. Then click **Save As**

9.2.9. **Choose a location to save the Excel worksheet** where you can easily find it later. Keep the location simple since you will have to be able to find it again when you import. We often use the Desktop for expedience.

9.2.10. Click in the '**File name:**' text box and name the Excel worksheet. Note that depending on your version of Excel this window may appear differently.

9.2.11. Click in the '**Save as type:**' menu and choose Excel Workbook (*.xlsx)

9.2.12. Click **Save**

9.3 Updating your Spreadsheet for Import

	A	B	C	D	E	F	G	H	I	J	K
						2019 Base Budget	2019 Base Statewide Adjust.	2019 Current Svcs Base	2019 Base Budget Changes*	2019 Total Base Request	
1	Line Seq	LS Name	Program	Natural	Natural Name						Justification
2	1000101	Director of Administration	Central Management	641300	Software Maintenance Agreements	250,000	0	250,000	0	250,000	
3	1000101	Director of Administration	Central Management	641400	Maintenance/Repairs: Office Equip	600	0	600	0	600.00	
4	1000101	Director of Administration	Central Management	643030	Food	500	0	500	0	500.00	
5	1000101	Director of Administration	Central Management	643110	Office Supplies & Equip	7,500	0	7,500	0	7,500.00	

9.3.1. Get to know your spreadsheet.

- The fields that import are the 'codes' – such as Line Sequence 1000101, Natural 641300. The names in the example columns B,C, and E exist to help users but will NOT be considered on Import. That means if you add a new row you do NOT have to include names on those rows. If you change a name, nothing will be impacted.
- The columns of data consist of display columns, for informational purposes, and editable columns. Only Editable columns will import. To help users spot editable columns, an * is added as a suffix to the column labels. If you change a display column, there will be no impact (it is ignored on import)
- The number of columns and the order of columns cannot change. The import expects the exact file format that was exported. Do not add additional columns to the right or insert/delete columns (or if you do – put it back in this format prior to trying to import).

9.3.2. Make changes in your spreadsheet. Below are example changes:

- **Change** the 2020 Base Budget Changes (row 2) in the example from 0 to 1000. Type 'new software' in the Column Text Field. When you import the file, BFM will load the new record. 2020 Base Budget Changes will update from 0 to 1000, the new 2020 Total Base Request will read 251,000 and the Justification text will be updated.
- To **delete** data, do not delete the row, but rather you must zero out the data by entering a 0.
- To **add text**, type in the columns that have text. If text exists, just type over the text in the cell. Prior text is also saved in the audit trail. In row 4, type in new text for example 'expense increase'.
- To add a **new row**, insert a row. They do not have to be in order. In our example, we will insert a new row after the existing row 4 to add an additional expense item. In this example, Overtime was added as an expense item. Remember, you must have security to the Line Sequence you enter and the Natural must be a valid code for the record to upload.

	A	B	C	D	E	F	G	H	I	J
	Line Seq	LS Name	Program	Natural	Natural Name	2019 Base Budget	2019 Base Statewide Adjust.	2019 Current Svcs Base	2019 Base Budget Changes	Column Text

Below is a table with Audit Fields and Descriptions:

Budget Form Expense Line History	Budget Form/Magnifying Glass
Field	Description
Record Type	The source of the data.
Stage Code	The stage to where the amount by which you changed the data is posted.
Posting Code	The posting code used in BFM. Most entries save to BUDGET; clnt_txt2, clnt_txt3 are the text entries.
Fiscal Year	The fiscal year.
Period	The fiscal period, it will generally be 0 to indicate we are not budgeting by month.
Last User	The user who saved the change.
Updated	The time and data stamp of the change.
Amount	The amount by which you changed the data is posted. The sum of these amounts should reflect what is seen on the Details page.
Amount Justification/Comments	For Posting Codes = clnt_txt3, this displays line text. For all other entries, this displays the audit text.

9.5.2. Click **Close** button to return to list of budget lines.

9.6 Adding a New Budget Entry

The form will display all of the accounts that were used in the prior year actuals or current year adopted budgets. In some cases you will need to add a new account for the budget request.

9.6.1. From the Form Details page, click **Add New**.

11651	5830 - Computer Operations	2201	5830	60	11/30/2016	u1	Submit	Header Detail
11652	5835 - Technical Projects	2201	5835	48	11/30/2016	u1	Submit	Header Detail

9.9.1. Select your budget form definition.

9.9.2. For the instance you wish to submit, click the **Submit** button.

9.9.3.A **Submit Budget Form** pop-up window opens. From this screen, select the stage to which you wish to submit (there may only be one) and click **Submit**. If you do not see a Stage Code, this means you do not have security to submit. Note: you can submit to a prior stage if your security allows this action.

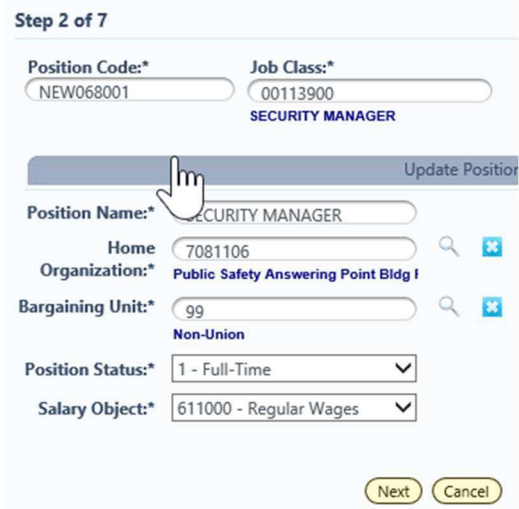

The screenshot shows a 'Submit Budget Form' dialog box. It features a title bar with the text 'Submit Budget Form' and a standard window control icon. The main content area is light blue and contains a label 'Select a Stage:*' followed by a dropdown menu. The dropdown menu is open, displaying a blue header 'Select a Stage Code' and a single option '9203 - OMB Analyst Review'. To the right of the dropdown are two buttons: a yellow 'Submit' button and a grey 'Cancel' button. Red rectangular boxes are drawn around the dropdown menu and the 'Submit' button in the image.

Once submit is clicked, the budget request will no longer be visible in the list if the user does not have security rights to edit at the new stage. In order to edit the instance a request that the form be sent back to the user must be made to the system administrator.

10. New Position Wizard

The New Position Wizard is present in several places in BFM, Decision Packages position tab and Employee Maintenance. It works the same way in all cases.

Follow each step to completion. If you click **Cancel** or **Back** in many cases the position will be cleared out and you will have to start over. This prevents partially-created positions from being put into the PCF projection.

Form:	New Position Wizard

If requesting multiple positions for the same job class, change the Authorized Count to a different integer value, such as 5 Enter desired Authorized FTE to the position being request. An FTE from 0 to 1 can be entered. Select Vacant Option 1-1 to create one record per Authorized Count Click Finish and the position is created 	

Specific Budget Form Instructions

The general instructions in sections 8,9 and 10 are supplemented by the following instructions for each form.

11. 2025 Base Budget (9200, 9210)

The Base form should reflect the cost of current services based on projected FY 2025 costs. This form excludes Natural Accounts for most salary and benefit adjustments, which are entered on other forms.

11.1 Import-Export Notes

The editable columns are highlighted in yellow. The columns with an * in the column heading correspond to the editable fields on the 9200 or 9210 form detail screens.

FormExport_9200.xlsx - Microsoft Excel

12. Contracts

The base budget form will be used to create contract budget requests. As noted above, the base budget form will display all the accounts that were used in the prior year actuals or current year adopted budgets. In some cases, you will need to add a new account for the budget request.

12.1 Reports

12.1.1. Run report **106 – Contract Summary** to see the contract natural entries.

12.1.2. Upload the Contract Details template to the base budget form.

BR-3B.xlsx

13. Decision Package – 2024 Revised / 2025 Budget Request (9230)

- Decision Package:
 - ✓ Agencies will be asked to input their outyear forecast for constrained and unconstrained Decision Packages in the BFM budget form. If the outyear field is left blank, the Budget Office will assume that the proposal's outyear impact will remain steady and will apply standard growth rates to estimate outyear costs. However, if proposals have unique outyear impacts (for example, if a proposal begins six months into a fiscal year, or there are expected changes in caseload across years, or a proposal is a one-time expense and does not have outyear costs) agencies should include their outyear estimates in the Decision Package form.
 - ✓ The Decision Package form include revenue natural account codes, which will allow agencies to create Decision Packages with revenue impact in BFM. The inclusion of revenue natural account codes on the BFM Decision Package form will allow agencies to submit stand-alone revenue generating proposals as well as comprehensive proposals that include both revenue and expenditure components. This change will also allow for a more efficient tracking of such proposals across agencies and throughout the budget development process. If you have questions about utilizing revenue natural account codes on the Decision Package form, please contact your assigned Budget Analyst.
 - ✓ While base budget changes can continue to be submitted through the BFM base budget form, as has been the case in previous years, agencies will also be able to submit base budget changes utilizing the Decision Package form in BFM. Alongside "Constrained" and "Unconstrained," agencies will now be able to select "Base Budget" in the dropdown menu on BFM Decision Package form.
 - ✓ The base budget change Decision Package is provided as a convenience to agencies that wish to group changes together or provide additional detail in the item description field about a given change. Agencies should group base budget changes by program and provide explanations for each shift within the BFM item description field. For more complicated base

budget changes, which generally would include changes to a line sequence that are less than either \$10,000 or 10% of the line sequence value, whichever is larger, agencies should include additional analysis and contextual information in BFM. Note that small shifts may not require detailed narratives but would still benefit from explanation to Budget Office analysts.

- ✓ Base Budget changes in the Decision Package are reflected in both constrained and unconstrained Decision Packages in the Agency Request.

Note that:

- Decision Packages are zero-based requests that group together related line items that impact services.
- The Decision Packages will be evaluated in their entirety (approved/rejected) or may have line-item adjustments in future phases.
- Budget impact statements are produced as reports based on the data entered in this form.
- New positions or adjustments to positions can also be made in this form.
- Assign a Type that indicates if it is part of the Constrained, Unconstrained or Base Budget request.

13.1.1. Go to Budget Formulation / Decision Package - Agency (9230) forms.

Unlike base forms, there are no Form Instances created as a starting point for Decision Packages since they are zero-based. Once you create a new Decision Package it will appear on the screen shown below.

15. Strategic Planning – Updating Measures and Agency Text

This form has two purposes, to create new performance measures, update existing measure descriptions, and update Agency Text for the budget book Volumes 1-4. Reports for this section are found in folder 3.3 Performance Measures.

15.1 Update Agency Descriptive Information

Go to Budget Formulation / Strategic Planning Locate the agency you wish to update and Edit.

Paste in the values for Mission, Agency Description, and Statutory history from the budget document or other source. Notes:

- The Strategic Initiative and Strategic Issues tabs are not used at this time.
- In some cases, special formatting may exist in the current descriptions. The text boxes provided are unformatted text so items such as bullets or CTRL+Return paragraphs should be checked when you save to ensure the text looks correct.
- A rich text option may be offered in the future to allow for formatting in the printed document.

Parent Code:

Mission Strategic Initiative Strategic Issues

Agency Mission: To manage the State's financial, human, and other resources in support of other state agencies carrying out their responsibilities to provide the citizens of the State of Rhode Island with the most responsive and cost effective services possible. To oversee the provision of statewide supportive services to all departments and agencies in conformance with legislative and policy mandates. To ensure that programs of the Department are efficiently organized and implemented.

Agency Dscr: The Department of Administration provides supportive services to all Rhode Island departments and agencies for effective coordination and direction of state programs within the framework of a changing administrative and fiscal environment. The department also provides policy direction for executive leadership in a variety of financial and administrative matters. It is responsible for the statewide implementation of policy decisions and delivery of services administered and supported by the state. The Department, headed by the Director of Administration, includes the programmatic functions of Central Management, Legal Services, Accounts and Control, Management and Budget.

Statutory Hstry: The Department of Administration was created in 1951 to consolidate central finance, purchasing and management functions of state government. R.I.G.L. 42-11 establishes and provides for the organization and functions of the Department of Administration.

16. Personnel Changes – Employee Maintenance

16.1 Employee Maintenance

Employee maintenance is used for making updates to your existing set of employees. Generally, these would be:

- Incorrect steps from the HR data
- Home organization (where an employee is assigned)
- Changes in allocations

- Add missing benefits or supplemental pays
- Updates to Job Class (be careful to ensure step/grade/salary table are correct)

16.1.1 Go to PCF/Employee/Employee Maintenance

Use the search limiters at the top of the page to find the employee.

- **Record Status:** Not commonly used but may be of useful using 'Updated Today' or you can view what the other filters do for your employee set.
- **Filter Criteria:** Choose an option, such as Employee Last Name or shown below, Position Code. Then, put in the value in the 'Search Limiter Text' in the column on the right.
- Click **Apply Criteria** to search.

Records per page: - Records: 1 - Page:

16.1.2. To change employee information, click **Edit**. There are three tabs that are generally of interest.

Add New Employee

1. Click on Add New Employee

 A screenshot of the 'Employee Maintenance' form. The 'Record Status' is set to 'All Employees'. The 'Add New Employee' button, which has a person icon, is highlighted with a red rectangle. Next to it is the '+ New Position Wizard' button. Below these buttons are tabs for 'Position' and 'Employee'. At the bottom, there is a 'Records per page' dropdown set to '50' and an 'Advanced Search' button.

2. Choose an existing position code or reach out to the Budget Office to get one added. Use an employee's real employee ID where possible; otherwise, choose a unique ID in the BFM system. Reach out to the

Budget Office for assistance, if needed.

Here you can adjust the Funding Start/End Date of the employee record. This date controls the dates the employee will be projected. The Funding Start Date was loaded as the Hire Date for all employees and is defaulted to 9/1/2018 for all new vacant position requests.

Adjust **Funding Start** and **End Dates** as needed.

16.1.3. Search for **Allocation Profile** to select an allocation profile that has been established for your agency. If NONE is entered the employee's allocation will default to the Home Organization.

16.1.4. Click **Save**

To Add an Allocation profile

16.1.5. This is an administrative function. There are benefits to creating allocation profiles. The best use case is where multiple employees are allocated to many line sequences. An allocation profile captures all line sequences and can be applied to multiple employees. If the allocation changes, these changes can easily be applied to all employees using the profile. Allocation profiles are not required. The same can be accomplished with allocating multiple line sequences in the allocation tab on the employee record.

To Edit the Allocation lines

16.8.6. Click **Edit** on Allocation line.

Funding Dates Actions: Add New Funding Date Duplicate Funding Date Close

Page Actions:

Allocation Record Actions: Add New Allocation Duplicate Allocation

20. Authorized Red Balances (9240)

This form is used to create Authorized Red Balance (ARB) entries. These will be approved using the same workflow as other budget entries but will be reviewed, and if approved, sent to the financial system apart from the rest of the budget process.

Since this is a zero-based form, click Add New to create an ARB.

Revised Budget ARB

There are no records available.								

Records per page: 25

Records: 0 - Page: 1

Submit the ARB to your OMB Analyst, who will route through approvals and initiate the process to load the data to RIFANS.

20.1 Reports

501 - ARB Details

21. BFM Reporting

21.1 How to Access BFM Reports

- **Access through BFM Links:** Log in to BFM and click on the Links dropdown / BFM Reporting

21.2 Multiple Sessions

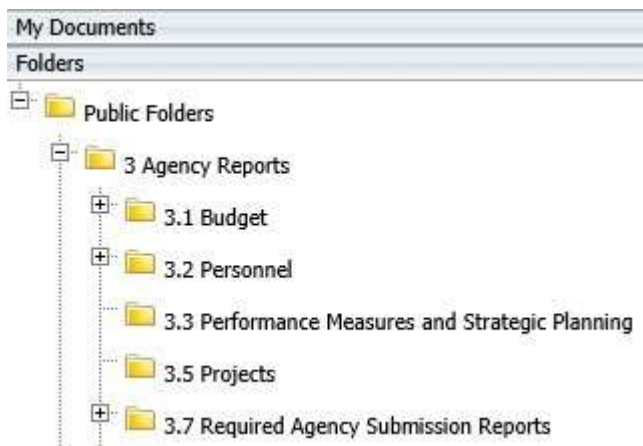

Use **CTRL+N** to open up two sessions of Internet Explorer. This will allow you to have reports open in one tab and the BFM application open in another window. You can enter data in BFM and refresh reports. This is especially useful if you have two monitors.

21.3 Logging In

Single-sign on is used to log onto BI Launch Pad, there is no second log in.

22. Running Reports

22.1 Basic Navigation

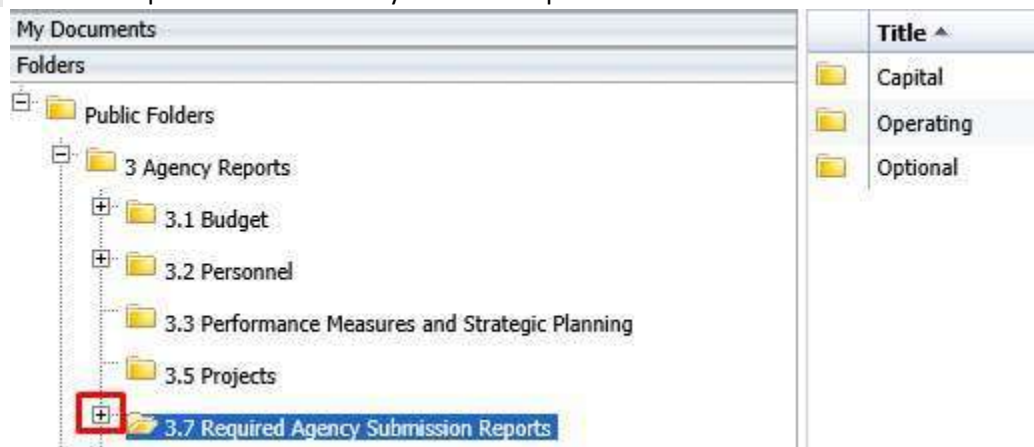

22.1.1. There are two tabs in the upper left, **Home** and **Documents**. Click on **Documents** to see the report folders.

22.1.2. There are sliders on the left hand panel that are a bit tricky to use. The first is **My Documents**, where any personal documents may be saved, but this is not heavily used.

22.1.3. **Folders** is where all standard reports are housed. The active slider is above the white space; in this screen shot Folders is Active. If My Documents is Active, Folders is all the way at the bottom of the screen. When you click on **Folders** it will slide to the top and open up the **Folders** section.

22.1.4. Click on the plus to the left of any folder to expand the folder structure.

22.1.5. Click on any folder see the reports available.

22.2 Opening a Report

22.2.1. Navigate through the folders to the report to be run.

22.2.2. **Double click** on the report to be opened

When the report is open, the report header will display as a tab along with the Home and Documents tabs:

More than one report can be open in the same session. Each report will appear as an additional tab to the right of existing tabs. To open additional reports, click the Documents tab to return to the available reports.

Most reports will be set to 'auto refresh', meaning the report will refresh the data after you open it. All end user reports have prompts (see Report Prompts below) that must be completed.

22.3 Report Prompts

The prompt screen will display with default values selected when a report is opened or when a report is refreshed. In the Prompts Summary area there may be multiple prompts that appear.

- You have to click on each Prompt you wish to fill out (or is required) and follow the procedures below to complete them.
- The active Prompt is highlighted in Blue; there are four distinct prompts in the screen print.
- Optional prompts have a green circle with a checkmark when the prompt is empty.
- Required prompts have a red circle with a "x" when the prompt is empty.

- Depending on the report that is opened, all prompts (listed below) may not be available. Each report may have different prompts.

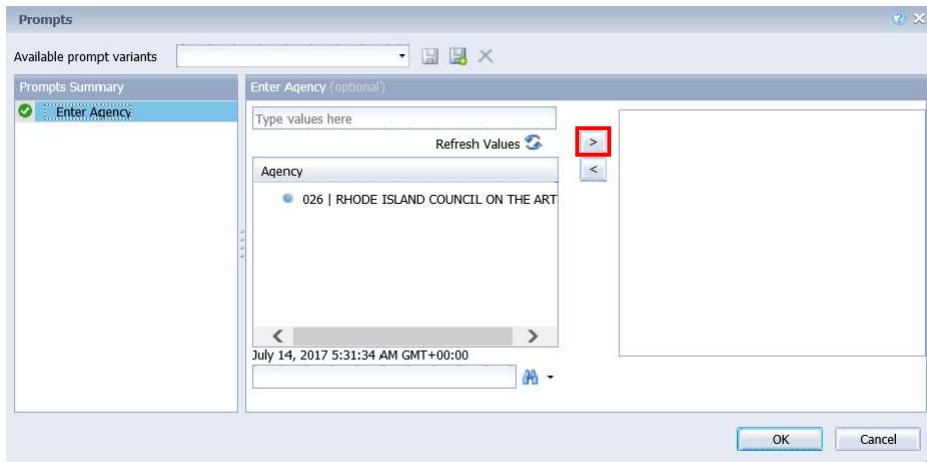

22.3.1. To change the default prompt value there are three options:

- Selecting a value from a list
- Entering a value
- Searching for a value

22.3.2. To select a **value from a list**, click the **Refresh Values**  button. All of the valid prompt values will display in the box below. Highlight the value you wish to select and **Double click** or click the right arrow. For a LIST type prompt you can repeat this and select multiple codes.

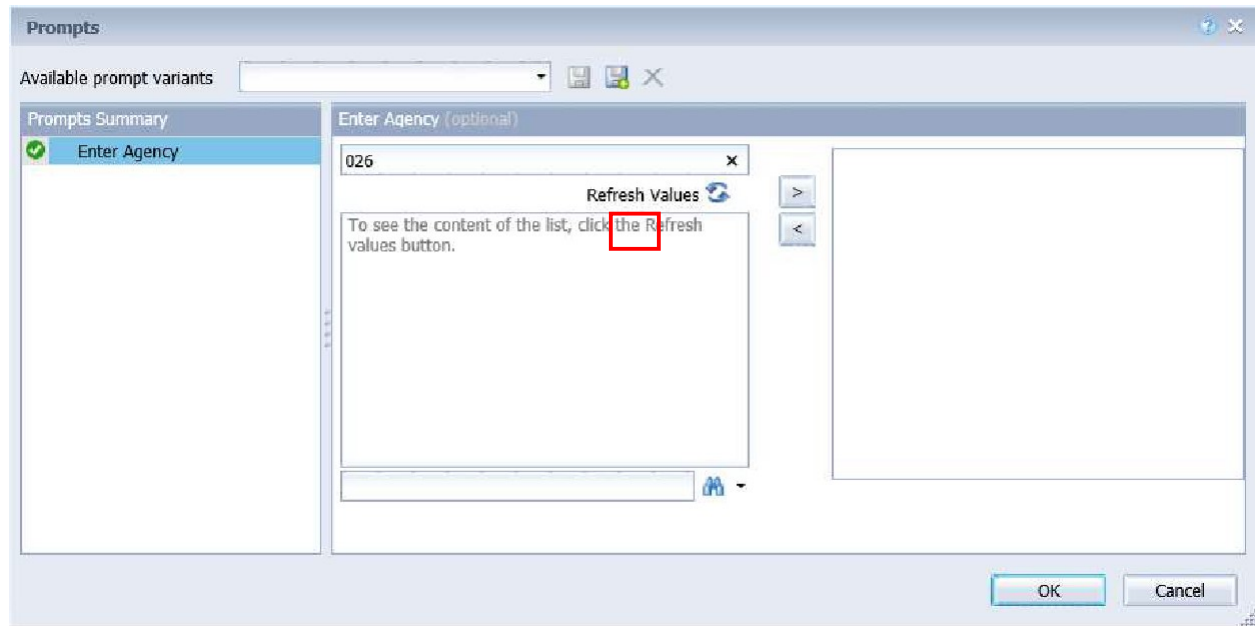

You can also CTRL+Click to select multiples at one time.

After double click:

22.3.3. To **enter a value**, type the value into the "Type values here" box, then click the **right arrow**

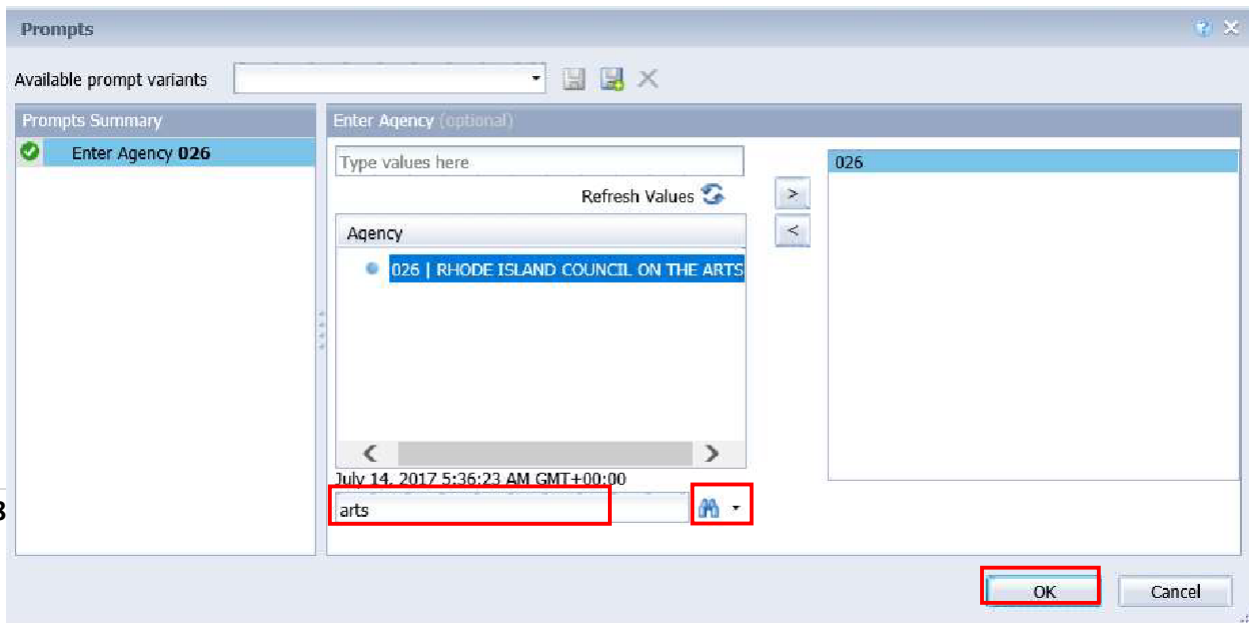

After clicking the **right arrow**, the default prompt value (if there is one) is replaced:

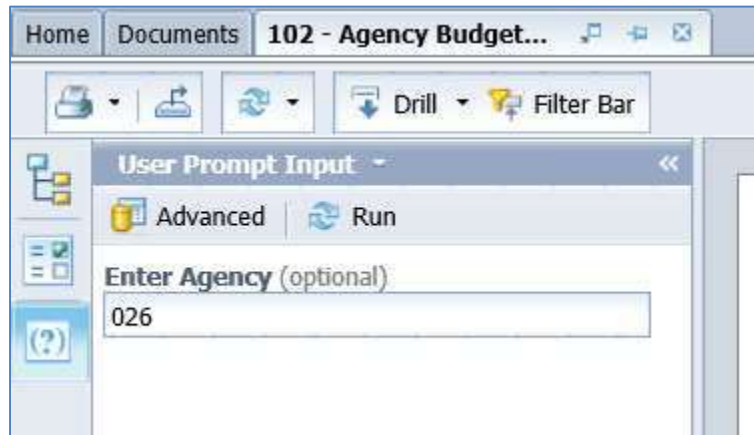

22.3.4. In many cases the lists are long. To search for a value, type the value in the field to the left of the **binoculars** , then click the **binoculars**. Partial values can be entered and all values that contain that partial value will be searched. Then **double click** the value to be used for the prompt.

22.3.5. Once all prompt values have been selected, click the **OK** button. The report will run. If **OK** is NOT highlighted (it appears light gray), this means a required prompt has not been completed.

22.4 Report Icons

Toolbar Actions

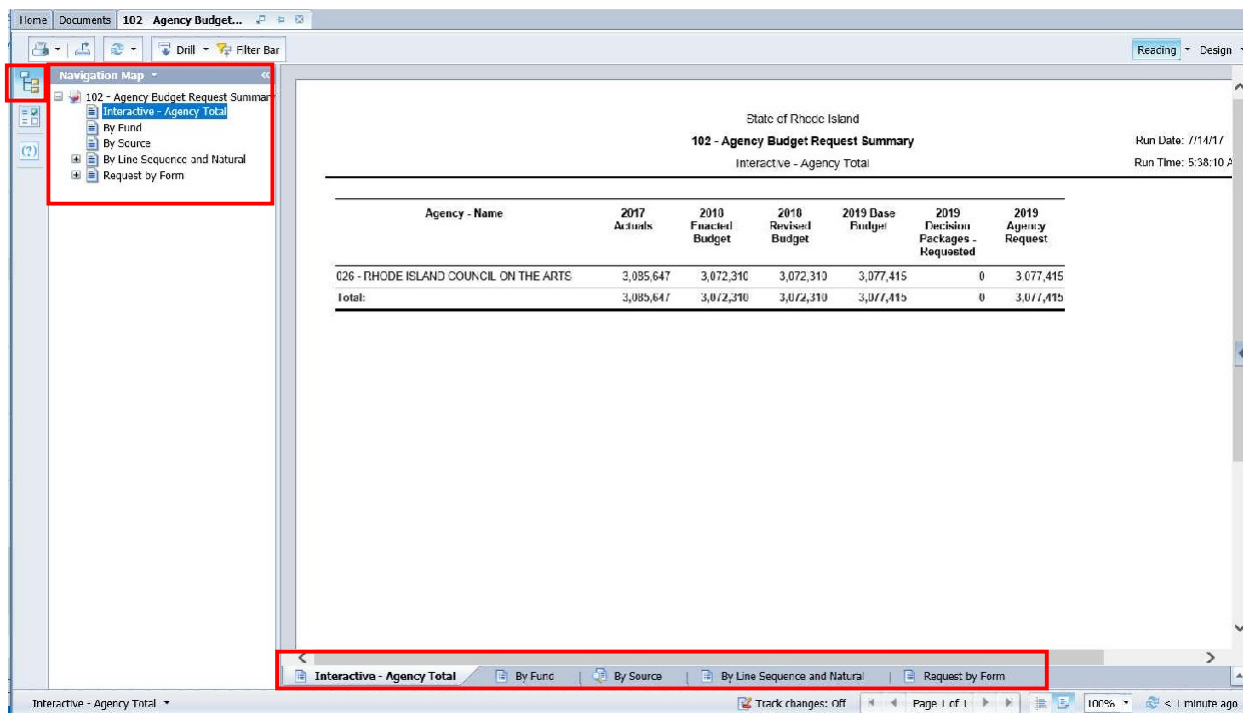

-  Print current report (tab) or all reports (all tabs).
-  Export current report (tab) or all reports (all tabs) into a PDF or Excel.
-  Refresh data by rerunning using the prompt window.
-  Enables the drill capability in the report.
-  Displays the filter bar at the top of the report. Objects can be added to the filter bar to restrict what is displayed in the report.

Side Panel Actions

-  Displays the Navigation Map which includes all report tabs and any sections added to report navigation.
-  Displays the Input Control options. Input controls are used to determine what data is displayed in the report.
-  Displays the User Prompt Input options.

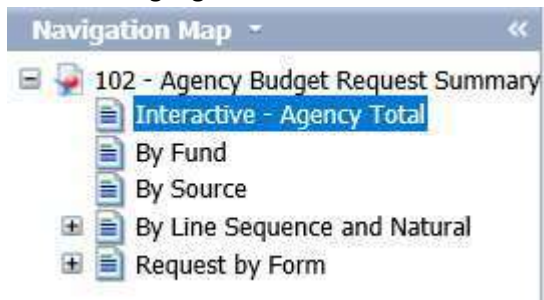

22.5 Report Navigation – Document Tabs

Different views of the same data can be captured in report tabs. First, click on the “Navigation Map” button on far left side. The Navigation Map will appear. There are two ways to move between tabs within a report: the Navigation Map or the Tab Strip.

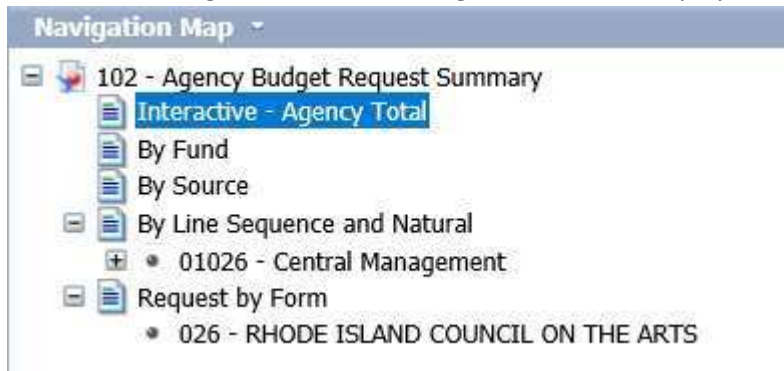

Navigation Map

22.5.1. To display the tab, click on the tab in the Navigation Map. The tab currently displayed is highlighted.

22.5.2. If a tab has a plus sign, report sections have been added to the navigation map.

22.5.3. Clicking on the sub-tab navigation item will display that specific section in the report.

Tab Strip

22.5.4. To display the tab, click on the tab in the Tab Strip. The tab displayed currently is highlighted.

Paging

To move between pages of a report, click the arrows or enter a page number.

40 - Operating supplies and Expenses	38,412	81,110	81,110	81,110	0	81,110
50 - Assistance And Grants	469,142	480,000	480,000	480,000	0	480,000
Total: 2885102 - Partnership Agreement	721,823	781,454	781,454	773,774	0	773,774

The screenshot shows a report table with three columns of data. Below the table is a tab strip with four tabs: 'Interactive - Agency Total', 'By Fund', 'By Source', and 'By Line Sequence and Natural'. The 'By Line Sequence and Natural' tab is highlighted with a red rectangular box. Below the tabs, there is a status bar showing 'Track changes: Off', 'Page 1 of 1+', a zoom level of '100%', and a timestamp '4 minutes ago'.

To advance pages, click the **inner arrows** to move one page at a time and the **outer arrows** to move to either the first or last page.

22.5.6. To select a specific page, click on the **Page 1 of 1** to enter a page number and then click **Enter**.

Zoom

22.5.7. To change the viewable portion of a report, change the zoom percentage on the bottom tool bar.

Zoom options include:

22.6 Refreshing a Report While Open

Once a report is opened, the values in the report can be updated by refreshing the report.

Refresh with Prompts

22.6.1. Click the Refresh button in the tool bar under the report name:

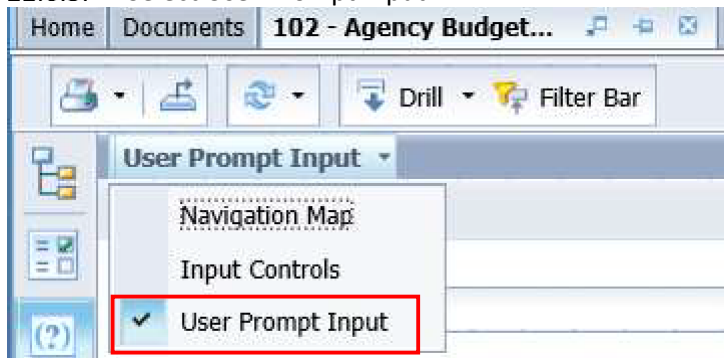

22.6.2. The prompt screen reappears. Complete the report prompts as directed above.

Refresh From User Prompt Input

In the upper left, the Navigation Map/Document Summary drop down contains an option for User Prompt Input. Selecting this allows you to change values by simply typing in new values and clicking Run. There is a slight time savings to using this method if constantly refreshing the report.

22.6.3. Select User Prompt Input

22.6.4. Type in the Organization or other values in the prompt areas. There are no values from which to choose, so you must type in a valid entry.

User Prompt Input

Advanced **Run**

Enter Agency (optional)

026

22.6.5. Click **Run**. The report will be refreshed with the data for the values you entered.

22.7 Drilling through the Report

Drilling displays the data at different levels of summarization.

Interactive - Agency Total | By Fund | By Source | By Line Sequence and Natural

22.7.1. Click on the **Drill** icon to enable the drill functionality.

Option 1:

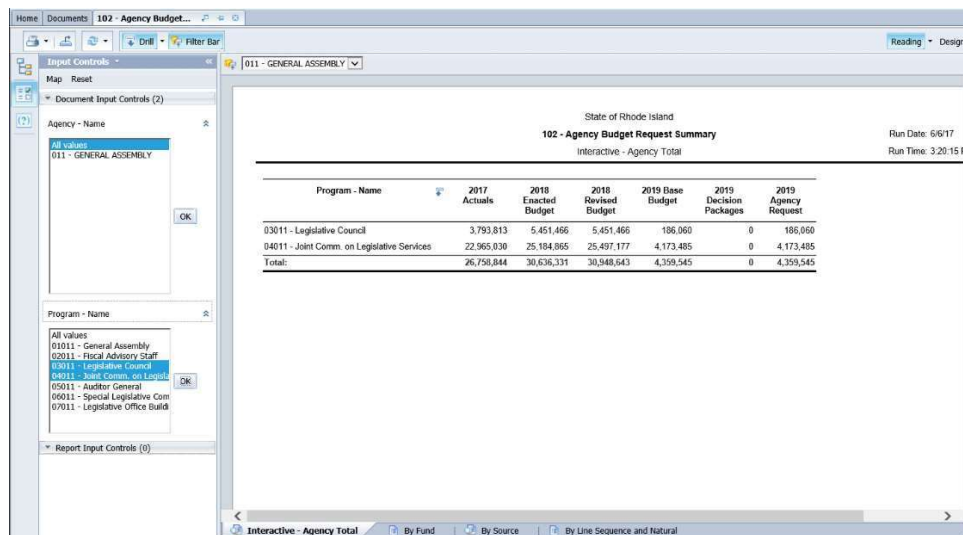

22.7.2. Left-click on any field that is underlined. It will automatically drill down to the next pre-defined level.

Option 2:

22.7.3. Right-click on the row you want to drill on and choose **Drill By**.

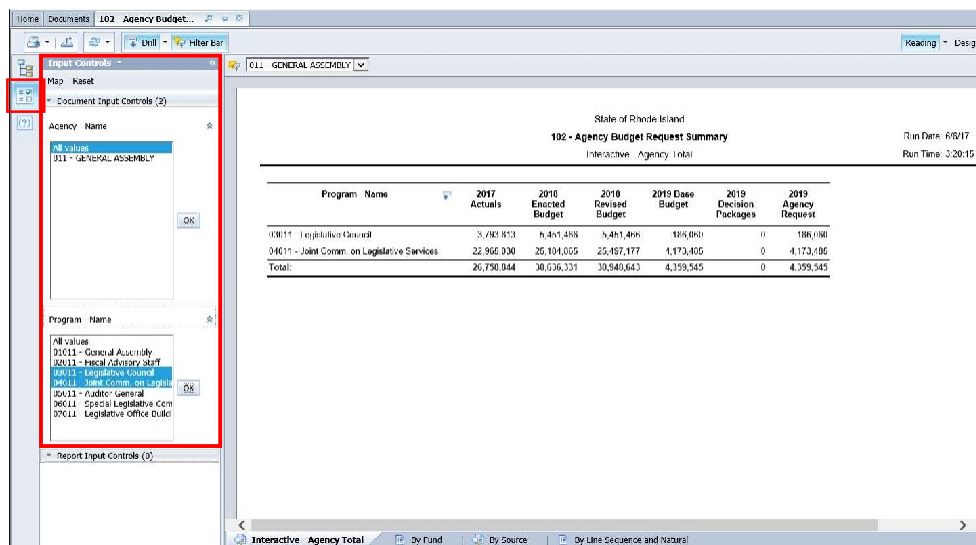

22.7.4. Select the drill dimension, the report will show the data at that level.

22.7.5. A filter bar will appear to let you toggle between values.

22.8 Limiting Data Using Input Controls

Input Controls limit data displayed in the report after refreshing.

- 22.8.1. Click on the **Input Control** icon to display the input control options.
- 22.8.2. Select one or many values from the input control. Hold down Ctrl to select multiple values.
- 22.8.3. Click **OK**
- 22.8.4. Select “All values” and click **OK** to return to the complete data set.

22.9 Exporting a report

Options to export include all report tabs or data as PDF, Excel, CSV, or Text. The Export icon on the upper tool bar provides an Export popup.
